

Specification Data Sheet

Rev 1.1 December 2014

Armour Home Electronics R&amp;D Department

The S7 NetServer is the central portal for all music services in any S7 system. It streams stored music, internet radio or music on demand services to up to 24 connected S7 NetAmp zones. There are three hard drive storage options; 320GB, 1.0TB and 2.0TB to suit different music libraries, all contained in the same compact unit. The server runs a Linux operating system and also includes a Logitech Media Server, CD ripping with data and cover art lookup software, as well as software to create 24 audio zones via USB connected NetAmps.

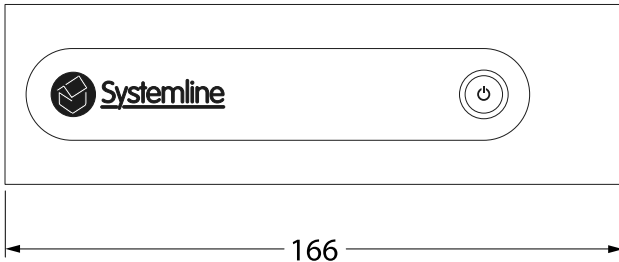

Connectivity		
1	Local Area Network - Ethernet	RJ45
2	19V DC @ 3.4A	Power supply
3	3 x USB2.0	NetAmp via USB hub
4 to 9	Not used for S7	Setup only

Hard drive		
SN2030	320GB	
SN2100	1.0TB	
SN2200	2.0TB	

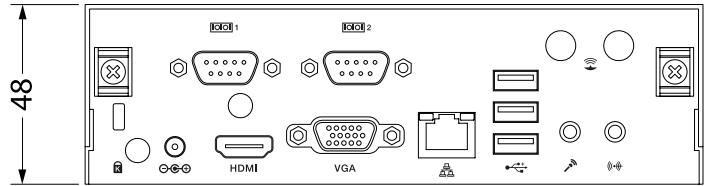

Motherboard		
Processor	Intel ATOM D2550 1.86GHz CPU embedded	
Memory	2GB	
Operating System	Linux Fedora release 20	

General		
Power	19V DC @ 3.4A	Via external power supply
Standby power	<0.5W	
Dimensions	Height: 48mm, Width: 166mm, Depth: 163mm	
Net Weight	1.2kg
