

Systemline S6

LIVING ENTERTAINMENT

At your fingertips - throughout your home

What is multi-room entertainment?

Imagine the whole family being able to enjoy and control their favourite music, in any room throughout your home.

A multi-room entertainment system will turn this dream into reality, with the freedom and flexibility to control and access all audio sources independently in every room.

Everything you'll need is at your fingertips, via stylish and intuitive keypads, with exceptional high performance audio delivered through discreet in-ceiling speakers or high fidelity speakers of your choice.

Why Systemline S6?

Superb high fidelity music anywhere you want it - for everyone to enjoy, in the living room, the dining room, the kitchen, the bedroom and bathroom - all completely discreet, with no clutter. S6 is also capable of controlling video distribution (including high definition video) to match the audio for a complete solution.

Systemline S6 allows up to six audio and video sources, e.g. MusicServer (160GB music library), CD player, tuner and DVD player, to be independently distributed into eight rooms of your home. The system also offers full iPod™ integration plus local inputs in every room, for those occasions when you wish to listen to an MP3 player or games console.

The system is hidden away in a cupboard (or similar), working seamlessly in the background while you unwind and enjoy the full benefits of multi-room entertainment.

In fact, all you'll actually see are the discreet in-ceiling speakers and the elegant colour TouchScreen that puts you in total control of your audio/video sources and even lighting.

Naturally the S6 system perfectly integrates with other products from the Systemline 'family', such as the Systemline MusicServer - a 160GB music library. This facility is used to store everyone's favourite music and then simultaneously playback different music in different rooms. Additionally, it can be used to access internet radio stations and music files stored on a PC or laptop.

Once you've experienced Systemline multi-room entertainment in your home, anything less will be a compromise.

Systemline is Europe's leading designer/manufacturer of high quality multi-room entertainment systems. We have over 20 years experience supplying the custom installation and new build markets with cutting edge technology and enjoy an enviable reputation for outstanding performance and reliability.

Simple elegance

Discreet in-ceiling speakers and stylish keypads result in virtually no intrusion into your living space. No more stacks of unsightly hi-fi separate boxes, room cluttering speakers and irritating cables. The Systemline S6 multi-room system offers a unique collection

of keypads - including the colour TouchScreen, that epitomise elegance and simplicity, for effortless, instantaneous control. Each boasting a range of optional finishes to complement your individual rooms.

MusicServer

iPod™

DAB Tuner

Lighting

Child's play

Systemline S6 controls sophisticated technology and delivers it through a simple, intuitive, TouchScreen* interface in each room - which the whole family can use. Controlling audio and video sources, such as the Systemline MusicServer, DVD player or even a docked iPod™ has never been easier.

At the touch of a button you can browse your favourite music by artist, album or playlist in the kitchen, whilst someone else takes a

relaxing bath, enjoying something completely different. The children can play their favourite music in their bedrooms or even plug a games console into a local input for superior sound reproduction.

The local input in every room allows individual access to iPods™, games consoles or TVs. iPods™ connect to the system through either dedicated in-wall or free standing docks, as seen above.

Life changing

Systemline doesn't merely fulfil your needs, it will exceed your expectations and deliver a truly luxurious multi-room entertainment experience. It will enhance your life so much, you'll want to use it from the second

you wake, until the moment you rest your head. Once you've enjoyed the delight of Systemline S6, you'll wonder how you ever lived without it.

Systemline S6 Controller

Capable of distributing up to six audio/video sources to eight independent zones, the S6 is a truly superb multi-room entertainment system, designed to work seamlessly with the market leading video distribution systems. Systemline S6 is capable of co-ordinating the video distribution* to match the audio.

*Via separate video distribution device.

Systemline MusicServer

The 160GB Systemline MusicServer is an easy to use, one box 'audio library', providing instant access to all your favourite music, categorised and organised just the way you like it. Naturally, for your complete convenience, you can control the MusicServer and enjoy your music at the touch of a button, and from anywhere around your home.

iPort - iPod™ dock

The iPort dock makes it easy for the entire family to use the Apple iPod™ and enjoy their digital music and digital photo collections in every room.

Systemline Advanced Colour TouchScreen

Made for the digital age, the Advanced Colour TouchScreen 'talks' to individual source components providing real time two-way feed-back. The simple back-lit menu offers intuitive navigation of a MusicServer, iPod™ (via iPort), and other sources such as a tuner, DVD player, or even lighting control.

Systemline Learning Keypad

Learning multi-source keypad module. Expanding on the simple control of the Multi-Source Keypad (right). This Systemline keypad combines simple source selection and with navigational controls such as track skip and volume up/down.

Multi-Source Keypad

Basic multi-source keypad module. The Systemline keypad allows source selection together with volume control.
